

How to Use the OverDrive 3.2 App for iPad

To download OverDrive e-books to the iPad, you will need to create an OverDrive account. For more information, see our directions entitled *How to Download the OverDrive app and Create an OverDrive Account*.

1. First make sure your iPad is set to accept cookies. From your home screen tap on **setting>Safari**. For iOS 7 set **Block Cookies to Never**. For iOS 6 and below set **Accept cookies to Always**.
2. When you first open the OverDrive app, you will see a blue screen with a background design. Locate the menu icon (three horizontal lines) in the **upper-left** corner. Tap on the menu icon.
3. Tap on **Add a Library**. Then type in your location. For example: *Eau Claire* or *54703*. Tap **Search**.
4. Select **Indianhead Federated**.
5. Select **Wisconsin Public Library Consortium**.
6. You are now on the Wisconsin's Digital Library search page. Sign in to see the most accurate availability. To do so, tap **Sign In**, in the upper right corner.
7. You will now see a space to enter your library card number. Enter the number and then tap **Sign In**.
8. You may now begin to browse or search. To browse, you may tap on any of the collections in the dark blue section. If you would like to search for something specific, tap **Advanced Search**, located just under the search box.
9. You may now perform a search with multiple limiters. If you are just looking for anything available, we suggest limiting the **format** to **EPUB eBook** and selecting **Available Now** (located near the bottom of the list) and then tap **Search**.
10. From the list, find a book you would like to check out, and tap the book image.
11. Next, tap **Borrow**.
12. Many titles have the option of being read through your Internet browser. This option will require Internet use to access the book for future reading. However, you may instead choose to download the book, which allows you to continue reading the book, even if you are no longer connected to Wi-Fi. To download, tap **Download (select format)**.
13. Next, select the format you would like to download. Select **Adobe EPUB eBook**.
14. Once you have selected the EPUB format, tap on the message that says **Confirm & Download**.
15. The book will now be in the **bookshelf** view. The app may automatically display the **bookshelf** view. If it does not, you can return to the bookshelf view by tapping the menu icon (three horizontal lines, in the upper-left corner), and selecting **Bookshelf** from the list of options.
16. To read the book, simply tap on the book image in the **Bookshelf** view. To exit the book, tap on the menu icon (located in the upper-left corner) and select either **Wisconsin Public Library Consortium** to look for more books, or **Bookshelf** to view other e-books you have downloaded.
