Oobleck:
solids, liquids,
and in between

1 A liquid is something that can be poured.

Find things that are liquid around your house.

What other liquids can you think of?

2 Solids cannot be poured.

What can you find around your house or outside that are solids?

3 There is also something in between a solid and a liquid called a suspension.

Sometimes a suspension appears to be a liquid and a solid.

4 Oobleck is a suspension.

Make your own Oobleck!

5 Stir together 2 cups of cornstarch and 1 cup of water.

6 Experiment with the Oobleck.

How does it act like a solid?

How does it act as a liquid?
