

Preschool STEM

Build and Measure Block Center

Activities and Conversation Starters

MATH

Materials:

Ruler or tape measure

Building materials such as Legos, Duplos, toy blocks, or even cereal boxes or empty pop cans!

Children learn best through play and preschool math can be as easy as building a toy train.

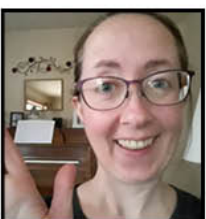

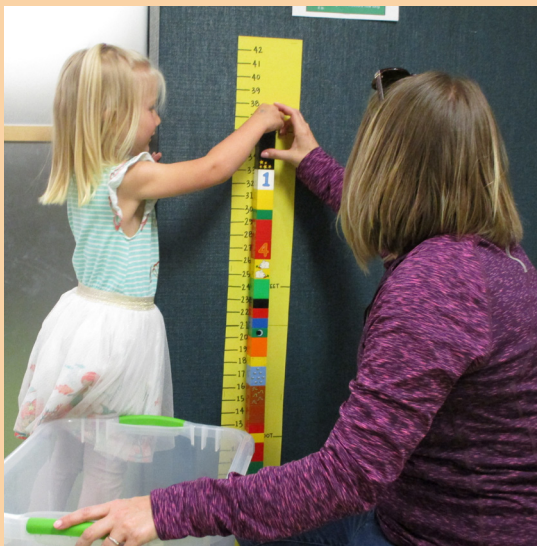

Try out this “math lesson” with your little ones!

1 Can you name the numerals on the rulers?

2 Build a tower with your building materials. How high is it?

3 Is a tower built with Lego Duplos or wood blocks more stable? How can you make it more sturdy? This is engineering!

4 Build a long train by laying items end to end. Measure how long it is. How many pieces did you use?
